Summary

Final-year Computer Science student specializing in native Android development with Kotlin and Jetpack Compose. Built and shipped three end-to-end Android applications with Firebase authentication, real-time data sync, and REST API integration. Strong foundation in data structures, object-oriented design, and clean architecture patterns.

Eduaction

D.R. K.N. Modi University, Rajasthan, India

Bachelor of Technology in Computer Science and Engineering

Jul 2022 – May 2026

CGPA: 7.98

Technical Skills

Languages: Kotlin, Java, Python

Frameworks & SDKs: Jetpack Compose, Android SDK, XML

Tools & Platforms: Android Studio, Git, GitHub, Firebase, Maven, REST APIs

Concepts: Data Structures & Algorithms, OOP, MVC, API Integration, Authentication & Authorization

Projects

Blog App (Oct 2025 – Dec 2025)

[🔗 GitHub Repository](#)

[📺 Tutorial](#)

Kotlin, XML, Firebase, Coroutines, RecyclerView

- Built a full-stack social blogging Android app supporting user authentication, blog publishing, search, likes, and saved collections.
- Designed the backend using Firebase Authentication, Realtime Database, and Storage to support secure, scalable multi-user data synchronization.
- Used Kotlin Coroutines to move network and database calls off the main thread, keeping the UI responsive under concurrent operations.
- Implemented View Binding and RecyclerView with a pagination-ready structure to handle growing content feeds efficiently.

Weather App (Jul 2025 – Sep 2025)

[🔗 GitHub Repository](#)

Kotlin, Retrofit, Gson, OpenWeatherMap API

- Developed a real-time weather app combining GPS-based location and manual city search using the Fused Location Provider.
- Integrated the OpenWeatherMap API via Retrofit and Gson for structured JSON parsing and reliable data fetching.
- Added SharedPreferences-based offline caching so users can view last-fetched weather data without an active connection.

Personal Notes App (Jun 2025 – Jul 2025)

[🔗 GitHub Repository](#)

Kotlin, Firebase Auth, Realtime Database

- Built a secure note-taking app with login, signup, and real-time synchronization across sessions using Firebase Authentication.
 - Structured data with Firebase Realtime Database to ensure notes update instantly across app restarts.
-
